

**Notes:**

1. Protect all stormwater facilities from sedimentation, debris, construction equipment, and foot traffic.
2. Fencing shall be installed around the perimeter of the stormwater facility once the facility has been planted and/or completed.
3. Fencing shall not be installed or removed without the approval of the Natural Resources Division.
4. Stormwater facilities shall be restored to their fully functioning condition if they accumulate sediment or debris during construction. Restoring the facility may include removal of sediment and sediment-laden soils, replacing the damaged soils/media, and replacing plants.
5. A "Stormwater Facility" sign shall be posted visibly on the outside of the fenced-in area. See example below.

**Example Sign**

- 16" X 12" Sign
- 1" Block Letters
- Black Letters on White Background
- 1/4" Black Border
- 100' Suggested Spacing Between Signs

**Stormwater Facility Protection**
